

NOTICE

Before replacing a stator, you must verify that you have the correct replacement stator for your shell assembly. Follow the instructions below.

Make sure the bracket on the replacement stator matches the bracket on the stator that is being replaced. See Figures 1 and 2 below.

CAUTION

DO NOT attempt to use an incorrect replacement stator. An incorrect replacement stator will not fit in the shell assembly and will cause improper operation.

IF STATORS DO NOT MATCH, CONTACT YOUR WAREHOUSE DISTRIBUTOR OR CEN CUSTOMER SERVICE to obtain the correct part. See part number list below for affected alternator models.
